Graph models with and without the HLCC moment regression, vs distance to the acquired window
GCN_L6: reach 36°
SNN_L6: reach 36°
GCN_L12: reach 72° (whole wedge)
SNN_L12: reach 72° (whole wedge)
GCN_L18: reach 108° (whole wedge)
SNN_L18: reach 108° (whole wedge)
reach (36°)
per-view MSE (mean over the test samples)
ρ(d) = std(prediction) / std(ground truth)
distance to the acquired window d (deg)
graph model (raw)
+ HLCC moment regression P4
floor: inter-sample variance of the ground truth
